Land for Wildlife Agreement

Landholder's Agreement *(Please note: This is not a Legal Agreement and is Non-Binding)*

I/we acknowledge that the *Land for Wildlife* status accorded to the land specified in the Property Statement and which is under my/our control and management, is conditional upon me/us making a reasonable effort on that land to pursue the maintenance and enhancement of native flora and fauna and/or to integrate nature conservation with other land management objectives.

I/we also acknowledge that any *Land for Wildlife* signs allocated for display on the land specified on the Property Statement under my/our control and management, remain the property of the *Land For Wildlife Program* and may be removed from the property, after due notification, at the discretion of the *Land For Wildlife Program Coordinator*.

I/we also agree to give reasonable notice to the *Land For Wildlife Coordinator* prior to relinquishing control of the above land, or of the leasing or rental of the land, in order that we may negotiate with any new owner/occupier as to whether *Land for Wildlife* status may continue to apply to that land. The *Land for Wildlife* sign needs to be returned if the property is sold and the new owner/s do not submit an application to join *Land for Wildlife*. In the case of organisations, I/we agree to give reasonable notice of a change in management personnel or policy regarding *Land for Wildlife*.

Your registration includes free subscription to the online newsletter to be sent to the email address as provided. Please advise if you **do not** wish to be subscribed to receive the *Land For Wildlife* newsletter. We do not mail newsletters to a physical mailing address. However, we may from time to time, send a letter confirming your membership details are still valid. This helps us to understand which properties are current and relies on postal address details to be accurate and up to date. Please advise of any change of address, by either email or post.

Please note that *Land for Wildlife* status applies to the whole property, as the aim is to manage all land in an integrated way, though the focus of habitat retention and restoration may only be on a portion of the property.
